PROFESSIONAL SUMMARY

Solution-driven Technology Manager with 5+ years of experience building secure, high-availability cloud systems and enterprise digital insurance platforms. Expert at aligning technical roadmaps with core business growth by implementing strict regulatory frameworks (NAICOM, NDPA, GDPR) and accelerating delivery through Rapid Application Development (RAD). Proven track record of leading distributed teams, standardizing DevOps pipelines (Docker, Ansible), and deploying custom AI (Hybrid RAG) to eliminate operational bottlenecks and protect the bottom line.

CORE COMPETENCIES

Technology Leadership: C-Suite Strategy | Technical Roadmapping | Agile/Scrum & RAD | Vendor SLA Management | Tech Budgeting

Cloud Architecture & DevOps: AWS (EC2/S3/Lambda/OpenSearch) | GCP | Firebase | Docker & Ansible | CI/CD Pipelines

Hardware & Software Infrastructure Management: Workstation & Server Deployment | Hardware Lifecycle Management | LAN/WAN Administration | Asset Inventory & Procurement

Software Engineering & AI: Python, Java, JavaScript, React.js, SQL/PostgreSQL | RESTful APIs | Large Language Models (RAG, GPT)

Security, Compliance & Design: IAM | Vulnerability Review | NAICOM, NDPA, GDPR Alignment | Adobe Illustrator & Photoshop

PROFESSIONAL EXPERIENCE

Project Implementation Specialist & AI Solutions Architect (*Lanzcape, Remote (Belgium)* | Nov 2025 – Present)

- Design and deploy secure cloud infrastructure and AWS data ingestion pipelines for an international EU policy monitoring platform.
- Built an AI advisory bot using Perplexity's LLM, GPT, and Hybrid RAG frameworks, delivering real-time automated data insights.
- Resolved critical deployment bottlenecks by implementing Docker and Ansible, improving release consistency and reducing manual errors.
- Optimized overarching architecture and search capabilities, reducing infrastructure costs by 70% within six months while maintaining strict data compliance.

IT & Digital Transformation Executive (*Goxi Microinsurance Co. Ltd., Lagos* | Mar 2025 – Present)

- Manage core infrastructure stability for enterprise digital insurance platforms, overseeing hardware and software deployment, system configuration, and network connectivity to maintain a strict 99.5% uptime baseline for a 1,000+ user base.
- Deploy automated product enrollment and secure premium payment APIs serving over 1,000 active users and agents.
- Collaborate with executive IT leadership to govern vendor SLAs and conduct rigorous software implementation reviews to remediate security vulnerabilities.

- Led internal digital transformation rollouts, ensuring NAICOM and NDPA data compliance while cutting customer onboarding times by 25%.

Head of Development (*ASMB OOD – Bespoke Audits Platform, Remote (Morocco) | Nov 2023 – Jan 2026*)

- Lead a 5-person remote engineering team building a scalable hospitality auditing solution for multi-client growth across three global regions.
- Apply Rapid Application Development (RAD) principles to accelerate feature delivery, reducing project delivery cycles by 40%.
- Oversee third-party API configurations, strict source-code quality checks, and infrastructure reviews to preserve a 95% client retention rate.

Founder & Solutions Provider (*Quonote Enterprise – Quonote Digital, Lagos | Jul 2022 – Present*)

- Direct end-to-end technical consulting, delivering scalable software infrastructure, database configurations, and custom AI tools.
- Drive overarching tech strategy, utilizing Adobe Illustrator and Photoshop to create high-impact visual assets and brand alignment for client platforms.
- Oversee full-lifecycle project management, from initial stakeholder requirement gathering to final cloud integration.

ICT Support & Systems Executive (*The Omar Group – Luxeria & The Wine Lab, Lagos | Aug 2024 – Mar 2025*)

- Engineered a secure, location-restricted local network solution using JavaScript and Geolocation APIs, ensuring proprietary data access integrity.
- Spearheaded the complete digitization of operational content and customer-facing interfaces across premium business units.
- Managed end-to-end hardware and software infrastructure across business units, including device lifecycles, system upgrades, and preventative maintenance, while negotiating vendor SLAs to reduce overall hardware procurement costs by 25%.

PROJECTS

InsurBridge AI (*Independent Technical Project*) | *GitHub*: github.com/deegeartz/heirs_insurance_hackathon

- Engineered a multi-tenant product distribution and automated underwriting solution tailored to modern digital insurance ecosystems.
- Formulated a custom AI and Hybrid RAG pipeline to accelerate data retrieval, eliminating legacy underwriting bottlenecks.

EDUCATION & CERTIFICATIONS

Master of Information Technology (MIS Specialization) – Miva Open University (In Progress)

Bachelor of Science (B.Sc.) Computer Science – Lagos State University (LASU)

Certifications:

AWS Certified Solutions Architect – Associate (Udemy)

ITIL v4 Foundation Frameworks | CompTIA A+ | Google IT Support Professional | Microsoft IT Support Specialist | HubSpot Certifications

Professional Affiliations:

Member, Nigeria Computer Society (NCS)

Member, Institute of Software Practitioners of Nigeria (ISPON)
